

A photograph of several pigs in a metal cage. The pigs are crowded together, and the cage bars are visible in the foreground. The lighting is somewhat dim, highlighting the texture of the pigs' skin and the metallic sheen of the bars.

Who's hogging our antibiotics?

Up to 70% of U.S. antibiotics go to farm animals that aren't sick, to offset crowding and bad sanitation. Unfortunately, this also promotes the development of deadly strains of drug-resistant bacteria that can spread to humans. Congress needs to protect consumers by preventing the misuse of antibiotics in animal agriculture.
