

The Widening Gap Update

SOUTH CAROLINA

Although South Carolina consistently paid its full annual pension contribution from 2005 to 2010, the system was 66 percent funded in fiscal year 2010 and faced a \$15 billion funding gap. Most experts agree that a fiscally sustainable system should be at least 80 percent funded. The state also had a \$9 billion bill for retiree health care costs, only 5 percent of which was funded, slightly below the 8 percent national average in 2010.

South Carolina lawmakers are considering legislation this year that would increase employee contributions, change the formula used to calculate benefits to provide a lower amount, and limit annual cost-of-living adjustments.

TOTAL BILL COMING DUE

South Carolina's retirement plans had a liability of \$53.6 billion and the state has fallen \$24 billion short in setting aside money to pay for it.

Pensions

Retiree Health Care

ANNUAL RECOMMENDED CONTRIBUTION

In 2010, South Carolina paid 100 percent of the recommended contribution to its pension plans and just 38 percent of what the state should have paid to fund retiree health benefits.

Retiree Health Care

HOW DID THIS STATE FARE?

South Carolina's management of its long-term liabilities for pensions was cause for **serious concern** and the state **needed to improve** how it managed its bill for retiree health care.

Pensions

Retiree Health Care

The grades for pensions and retiree health benefits assess how well the states have managed these liabilities. The pension grade is based on being above 80 percent funded (2 points), having an unfunded liability that is less than the payroll for active members (1 point), and paying at least 90 percent of the recommended pension contribution over the last five years (1 point). Plans that got all four points were solid performers, plans with two or three needed improvement, and plans with one or no points were cause for serious concern. Grades for retiree health benefits were based on whether the state's benefits had a funding level above the national average (1 point), whether 90 percent of the recommended contribution was made in the most recent year (1 point), and whether the state's plans were better funded based on the most recent data than they were in the prior year (1 point). States with two or three points were solid performers, those with just one point needed improvement, and states with no points were cause for serious concern. This fact sheet stems from a 50-state analysis of states' retiree benefit obligations by the Pew Center on the States. The full report and 50 state fact sheets can be found at
