May 14, 2014

To the Honorable Members of Congress:

I am writing to ask you to vote in favor of extending key clean energy tax policies, including the Production Tax Credit (PTC) for wind energy and the alternative fuel vehicle infrastructure investment tax credit, and allowing waste heat-to-power technologies to qualify for the existing energy Investment Tax Credit (ITC). These provisions will provide investors, manufacturers, and developers with certainty and encourage private investment in clean energy.

Due to the most recent expiration of the PTC at the end of last year, wind deployment in the United States dropped more than 90 percent in 2013. Congress must enact multiyear extensions of tools such as the PTC to ensure the continued growth of clean energy industries.

Coherence is critical to preserving the competitive viability of the U.S. clean energy sector. Providing parity in the energy ITC for all technologies, including waste heat to power, will help increase efficiency and reduce energy costs for large energy users, strengthening their competitiveness.

Inconsistent policies hurt the ability of the United States to compete in the global clean energy economy. Transparent, long-term, and consistent clean energy policies provide a critical signal to private investors while ensuring diversity in the energy sector, and I urge that you support these and other clean energy policies during consideration of tax extenders legislation.

Sincerely,
