The national school meals program provides lunches and breakfasts to many school children across the country, and provides them for free or at a reduced cost to children from low-income families. In this program, the federal government reimburses school districts for the costs of meals that meet certain nutrition standards, such as providing fruits and vegetables, limiting the use of salt, and following age-appropriate calorie limits. Individual school districts have the flexibility to build on the requirements, as long as the meals meet basic, minimum standards. To be clear, this school lunch is a full meal that can only be purchased as a full meal--it does not include extra items that can be purchased individually for additional money.

6a/b. Do you favor or oppose requiring schools to meet these nutrition standards for school meals? **(IF "FAVOR/OPPOSE," ASK:)** And do you strongly (FAVOR/OPPOSE) or somewhat (FAVOR/OPPOSE) this?

This includes food that is sold in school stores, food and drink vending machines, and a la carte items, such as a slice of pizza, a container of yogurt, a side of french fries, or a piece of fruit.

7a/b. Have you heard anything about new national nutrition standards for these other foods sold in schools such as food sold a la carte and in vending machines, sometimes referred to as the Smart Snacks standards? ?

Individual school districts will have the flexibility to build on the standards if they wish to, as long as they meet basic, minimum standards.
