Kentucky

Dental sealants are clear plastic coatings that take only a few minutes to apply to permanent molars, the most cavity-prone teeth. Research shows that school-based sealant programs reduce tooth decay by 60 percent at one-third the cost of a filling. Kentucky’s grade in 2014, a D, did not change from 2012.

2014 Grade: D

2012 Grade: D

How well is Kentucky protecting kids from tooth decay?

Grading

- A: 10-11
- B: 8-9
- C: 6-7
- D: 3-5
- F: 0-2

Kentucky earned 5 out of a possible 11 points on sealant policies.

For a detailed description of the grading system, see the methodology section of the report at pewtrusts.org/dentalsealants.

* Pew and the Association of State and Territorial Dental Directors (ASTDD) surveyed states to learn whether regulations require dentists to examine children before hygienists can apply sealants at schools — restrictions that research shows are unnecessary. State policies were categorized as follows: A dentist’s exam is not required — no restrictions; a dentist’s exam is sometimes required (e.g., certain classifications of dental hygienists can apply sealants without a dentist’s prior exam) — some restrictions; a dentist’s exam is always required — severe restrictions; and a dentist’s exam is always required and the dentist must remain on-site while the hygienist applies the sealant — most severe restrictions.
