

Preliminary National HIA Study Questionnaire

Welcome!

The Health Impact Project—a collaboration of the Robert Wood Johnson Foundation and The Pew Charitable Trusts—is exploring the impacts of health impact assessments (HIAs) on policies, health, and society. Harder+Company Community Research, an independent research company, is assisting in gathering information about these impacts from various HIA practitioners and other stakeholders.

You have been identified as a key HIA contributor. We would like to hear your thoughts about that HIA. Your responses will help us accurately reflect your work and the impact you have had through participation in the HIA. We will include summaries of this information on the Health Impact Project's interactive map at <http://www.pewtrusts.org/en/multimedia/data-visualizations/2015/hia-map>. Your feedback will also support a larger evaluation to examine the processes and outcomes of HIAs, including the types of health and health equity determinants that can be impacted by HIAs. When reporting findings, we will not link your name with your responses.

This questionnaire should take 15-20 minutes to complete. We recognize that this is a busy time of year and appreciate your commitment to completing this questionnaire to help inform future HIA work. Please complete this questionnaire by Aug. 22, 2016. If you have any questions or concerns about this questionnaire or would prefer to complete this questionnaire via phone, please contact Lauren Stein at Harder+Company Community Research by email at lstein@harderco.com or by phone at 530-757-8420.
