The Veterans Engaging in Transition Studies (VETS) Survey: An Expansion of The Veterans Metrics Initiative (TVMI) Study

WEIGHTED TOP LINE REPORT (DATA TABLES) FOR THE PEW CHARITABLE TRUSTS' VETS SURVEY (WAVE 7) QUESTIONS

Prepared June 30, 2021

Revised Dec. 14, 2021

Lead Data Analyst: Nicole R. Morgan, Ph.D.
Contributors: Jessie Rudi, Ph.D., & Kimberly McCarthy

BACKGROUND & OVERVIEW

This document contains the topline results for the Veterans Engaging in Transition Studies (VETS) Survey conducted by the Clearinghouse for Military Family Readiness at Pennsylvania State University (Clearinghouse) for The Pew Charitable Trusts. The Clearinghouse fielded the VETS Survey online in English from November 14, 2020, to January 5, 2021, among a nationally representative sample of 3,180 Post-9/11 U.S. military veterans. The margin of error with design effect for the total respondents is plus or minus 1.9 percentage points at the 95% confidence level.

Approximately 60 percent of the questions in the VETS Survey pertained to Pew's research questions, and the remaining 40 percent were devoted to the Clearinghouse's requirements. This document provides the Topline Results for Pew's portion of the survey.

This report provides the unweighted frequency, weighted frequency, percentages (weighted in all cases), confidence limits, and design effect for each question posed in the survey instrument. Note that not all respondents were presented with all survey questions.

For additional information regarding survey methodology, panel recruitment, and the development of survey weights, please refer to the companion to this document, *Methodology Report: VETS Survey 2020/2021 ("Wave 7")*.
