# The Clean Energy Economy Indiana

**Indiana has a large and growing piece of America's clean energy economy, with more than 17,000 jobs in 2007.** In fact, it is one of seven states and the District of Columbia where total jobs fell but jobs in the clean energy economy

increased between 1998 and 2007. The state's jobs in the Clean Energy category grew by 78 percent in that time—not a surprise, considering Indiana's recent leaps forward in the wind power industry. The American Wind Energy Association found that Indiana had the nation's fastest growth in wind power generation in 2008.<sup>1</sup> Additionally, the Hoosier State attracted \$26 million in venture capital in the past three years.

## BY THE NUMBERS, THE CLEAN ENERGY ECONOMY:

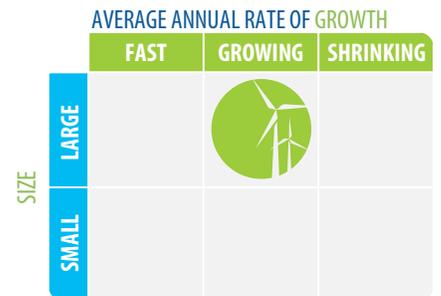

Jobs (2007): **17,298**

Businesses (2007): **1,268**

Venture Capital Funds (2006-2008)\*: **\$26,000,000**
