

# Moms for Antibiotic Awareness

Below is your August 2012 newsletter from the Pew Campaign on Human Health and Industrial Farming. This edition features a video of Supermoms visiting Capitol Hill, a new report on misleading meat labels, action from senators, and more.

Thank you for your continued support,

As August draws to a close and kids head back to school, many of us are faced with the daily task of packing a lunchbox. Unfortunately, because of confusing labeling practices by the meat industry, it is not as simple as you

would think choosing turkey or bologna to make your child's sandwich.

[A Consumer Reports investigation](#) recently uncovered numerous confusing and unverified labels indicating that no antibiotics were used in meat and poultry production. In response to these criticisms, [the U.S. Department of Agriculture has said](#) (PDF) that the Food Safety and Inspection Service (FSIS) is committed to reviewing labels on meat packages, so that consumers can make thoughtful and informed meat product purchases.

## Senators Call for FDA Action

Share this story: [f](#) [t](#)

Thirteen senators [sent a letter to the U.S. Food and Drug Administration](#) (FDA) urging it to tighten its recommendations for reducing the use of antibiotics on industrial farms. Several members of the House of Representatives [also weighed in](#), pushing for strong FDA action on the issue.

In their letter, the senators expressed concern that the new guidance leaves a major loophole that allows food animal producers to continue feeding antibiotics to healthy animals to compensate for overcrowding and to promote growth—in effect sidestepping the intent of the reform.

---

Antibiotic-resistant bacteria are not the only negative consequence of industrial animal agriculture. Manure pollution associated with concentrated animal feeding operations is a significant and growing threat to our water resources.

Please urge President Obama to take action.

## Support Legislation to Curb the Meat Industry's Overuse of Antibiotics

The Preservation of Antibiotics for Medical Treatment Act (PAMTA, H.R. 965, S. 1211) would protect seven classes of antibiotics vitally important to human health by withdrawing their use from food animal production unless animals or herds are sick with disease or

## A Supermom Goes to Washington

Share this story: [f](#) [t](#)

In our [new video](#) from the Supermoms Against Superbugs advocacy day in May, Supermom Everly Macario remembers the life of her son, Simon, who at 18 months old, contracted an antibiotic-resistant infection, MRSA (*[methicillin-resistant Staphylococcus aureus](#)*). None of the antibiotics doctors administered were able to cure him and he died. Learn about her trip to D.C. by watching our video.

With [support from people like you](#), who wrote to FDA last month on closing important loopholes in policy guidelines, there is little doubt that the government heard Everly's message and yours.
